10	XL/10
11	XXL/11

FEATURE

The gloves are machine knitted liners made from high cut resistant fibers blended with other synthetic yarn with Polyurethane coating to provide a good cut resistance barrier, while offering vastly superior dexterity and comfort.

The glove provides good protection against abrasion and tear in dry handling conditions. These gloves resist cuts but are not cut proof. Do not subject to high speed or serrated blades.

CAUTION! Avoid using near moving machinery due to entanglement hazards.

Gloves may cause allergic reactions in some individuals.

Store dry and cool sheltered from direct light.

Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. Gloves should not be left in contaminated condition if reuse is intended in which case gloves should be cleaned as far as possible. If appropriate, decontamination may take place under lukewarm water using laundry soap and detergent. Don't use chlorine bleaches.

Note: The performance characteristics of worn and laundered gloves may differ from the results shown below.
