

## Product data sheet for uvex bamboo Twinflex

**MADE IN GERMANY** 

### Manufacturer address

UVEX SAFETY Gloves GmbH & Co. KG  
 Elso-Klöver-Str. 6  
 D-21337 Lüneburg  
 uvex-safety.de

The patented Bamboo TwinFlex® technology combines the best of both worlds in one fine 18-gauge cut protection glove (Cut Level D): On the inside of the glove: Wearers experience noticeable comfort for their skin thanks to the natural bamboo fibres. The smooth fit and high moisture absorption with a rapid action provides long-lasting comfort and high wearer acceptance. With a flexible fit thanks to the natural bamboo fibre, the glove adapts precisely to fit the shape of the hand within 3 to 5 minutes of wearing. Keep yourself safe from external hazards: High-performance fibres offer a high level of protection against abrasion and cut hazards. The additional uvex protection zone in the area between the thumb and index finger provides double the abrasion resistance (200%) compared to the inside of the glove to increase its service life/durability. Thanks to the Xtra-Grip aqua-polymer foam coating, the Bamboo TwinFlex® D xg offers excellent grip in dry and slightly damp/oily conditions.

### Characteristics

- Good grip
- Very good cutting protection
- Very good breathability
- Excellent abrasion resistance
- Long service life
- Good fit

### Suitability for industrial work environments

- Suitable for dry and slightly damp work environments
