### CLEANING / MAINTENANCE

Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. Gloves should not be left in contaminated conditions if reuse is intended in which case gloves should be cleaned as far as possible.

### STORAGE

Gloves should be ideally stored in dry conditions in original package.

### OBsolescence

When stored properly, will not suffer changes in the mechanical properties from the date of manufacture. Service life cannot be specified and depends on the application and responsibility of user in ascertaining suitability of the glove for its intended use.

### GENERAL

The Gloves and the raw materials use in their manufacturer are not shown to be harmful to the wearer. The information contained herein is intended to assist the wearer in selection of personal protective equipment.

### PLEASE NOTE

The results of the physical tests should also help in gloves selection, however it must be understood that actual conditions of use cannot be simulated and it is responsibility of the user, not the manufacturer to determine glove suitability to the intended use.
